SUMMARY

- UC Berkeley Statistics and Applied Mathematics graduate with Financial Accounting and Forecasting coursework, seeking a strategic finance and corporate FP&A role. Experience in financial modeling, variance analysis and KPI tracking, and building clear reports and presentations for leadership, with hands-on fluency in AI tools and workflows.

EDUCATION

University of California, Berkeley

Aug 2023 – Aug 2025

B.A. Statistics (*Business Emphasis*) & B.A. Applied Math (*Data Science Emphasis*)

Berkeley, CA

- **Relevant Coursework:** Business Analytics, Financial Accounting, Principles & Techniques of Data Science, Forecasting, Linear Modeling, Concepts in Computing with Data, Modern Statistical Prediction & Machine Learning.

EXPERIENCE

Crestline Quota-Share Reinsurance Case Study

Jul 2026 - Aug 2026

Financial Analysis Project

Fremont, CA

- Evaluated proposed \$1.0M quota-share reinsurance deal (50% cession, 32.5% ceding commission) by rebuilding 6 years of loss ratios from 4,577-row policy bordereaux and loss run, deriving a 59% break-even loss ratio to frame decision.
- Identified data-quality failures using accounting identity checks (written = earned + unearned), uncovering 15 erroneous policy rows, formulaic patterns, missing IBNR; found AI-generated memo understated 2 loss years by 10-21 points.
- Built an expected loss ratio model (68%, sensitivity band 65-72%) incorporating cost-trend drift and a Poisson-based catastrophe load, then presented findings and defended the methodology to senior reinsurance professionals, recommending restructured terms.

BASIS Independent

Aug 2025 – Present

Mathematics Instructor

Fremont, CA

- Earned excellent performance reviews for communication and results while translating complex technical concepts into clear, digestible explanations, helping over 83% of students exceed standards on BASIS network comprehensive exams.
- Built LLM-assisted learning workflows using GPT and Claude to generate practice materials, standardize feedback, and personalize instruction, improving student engagement by 20%+ across two semesters.
- Developed 3 advanced math courses from scratch for 100+ students, creating scalable curriculum, rigorous assessments, and feedback workflows while coordinating with parents and school leadership to improve student outcomes.

BLCK UNICRN

Jan 2025 – May 2025

AI & Business Analyst Intern

Berkeley, CA

- Analyzed user behavior and engagement metrics (conversion rate, average session duration) to identify growth opportunities, support product decisions, and improve targeting strategies across 50+ accounts and 120+ contacts.
- Built a multi-source data pipeline across 20+ inputs to consolidate and validate data, then performed monthly variance analysis on KPIs against plan to identify key drivers, effectively reducing manual reporting time by 2 hours per week.
- Designed, iterated, and evaluated LLM prompts (GPT-4o) to improve output quality and relevance, enabling more effective automated responses for custom-built chatbot and marketing workflows.
- Developed structured reports and workflow documentation to support planning, performance monitoring, and cross-functional decision-making, ensuring outputs were accurate, timely, and clear for stakeholder review.

Beats by Dre

Jun 2024 – Aug 2024

Data & Consumer Insights Analyst Intern

Fremont, CA

- Analyzed 500+ customer reviews using natural language processing (NLP) techniques in Python, to identify patterns, pain points, product quality and risk signals influencing customer purchasing behavior.
- Cleaned, tokenized, and validated large-scale unstructured review data, ensuring quality and consistency that enabled 10+ distinct visualizations informing tailored marketing campaigns and communication strategy.
- Identified actionable insights on consumer priorities (i.e., sound quality, design, price sensitivity), contributing to a 15% improvement in targeted marketing by refining campaign messaging and alignment with audience profiles.

SKILLS

- **Finance & Business Tools (Proficient):** Microsoft Office (Excel, PowerPoint, Word), Google Suite, Power BI.
- **Programming & AI-Tools (Proficient):** SQL, Python, LLMs & Prompt Engineering (Claude, ChatGPT).
- **Other:** Excellent communication (written and verbal); Able to meet strict deadlines in schedule-driven environments.
- **Interests:** Personal investing; competitive chess (published author); competitive mathematics; golfing and swimming.
